

Changes by default author

You think water moves fast? **You should see ice.** It moves like it has a mind. Like it knows it killed the world once and got a taste for murder. **After the avalanche, it took us a week to climb out.**¹ Now, I don't know exactly **when** we turned on each other, but I know that seven of us survived the slide... and only five made it out. **Now we took an oath, that I'm breaking now.** **We said we'd say it was the snow that killed the other two, but it wasn't.** Nature is lethal but it doesn't hold a candle to man.

Changes by green author

The lysine contingency - it's intended to prevent the spread of the animals is case they ever got off the island. **Dr. Wu inserted**^{Green} a gene **tahtthat**^{Green} makes a **single**^{Green} faulty enzyme in protein metabolism. The animals can't manufacture the amino acid lysine. Unless **they're**^{continually}^{Green} supplied with lysine by us, they'll slip into a coma and die.

Changes by orange author with some remarks

Now that we know who you are, I know who I am. **I'm not a mistake!**^{OA2} It all makes sense! In a comic, you know how you can tell who the arch-villain's going to be? **He's the exact opposite of the hero.**^{OA3} **And most times they're friends, like you and me!**^{OA} I should've known way back when... **You know why, David? Because of the kids.**^{OA4} They called me Mr Glass.

No changes

Your bones don't break, mine do. **That's clear.** Your cells react to bacteria and viruses differently than mine. *You don't get sick, I do.* That's also clear. *But for some reason, you and I react the exact same way to water.* We swallow it too fast, we choke. *We get some in our lungs, we drown.* However unreal it may seem, we are connected, you and I. We're on the same curve, just on opposite ends.

¹No?

²OA: Yeah, I like animals better than people sometimes...

³OA: Especially dogs. Dogs are the best.

⁴OA: Every time you come home, they act like they haven't seen you in a year.
