You think water moves fast? You should see ice. It moves like it has a mind. Like it knows it killed the world once and got a taste for murder. Now, I don't know exactly when we turned on each other, but I know that seven of us survived the slide... and only five made it out. Now we took an oath, that I'm breaking now. Nature is lethal but it doesn't hold a candle to man.

Changes by green author

The lysine contingency - it's intended to prevent the spread of the animals in case they ever got off the island. Dr. Wu inserted a gene that makes a faulty enzyme in protein metabolism. The animals can't manufacture the amino acid lysine. Unless they're supplied with lysine by us, they'll slip into a coma and die.

Changes by orange author with some remarks

Now that we know who you are, I know who I am. I'm not a mistake! It all makes sense! In a comic, you know how you can tell who the arch-villain's going to be? I should've known way back when... You know why, David? They called me Mr Glass.

Your bones don't break, mine do. **That's clear.** Your cells react to bacteria and viruses differently than mine. *You don't get sick, I do.* That's also clear. *But for some reason, you and I react the exact same way to water.* We swallow it too fast, we choke. *We get some in our lungs, we drown.* However unreal it may seem, we are connected, you and I. We're on the same curve, just on opposite ends.
